

distance that the truck can travel on the vehicle distribution problem is detailed. Processing and obtaining an optimal path that is more realistic than previous studies. Future work, there are still a lot of deficiencies where the problem algorithm itself still needs a long calculation time, and the calculation degree is more complicated.

ACKNOWLEDGMENT

This work was supported by Institute for Information and Communications Technology Promotion (IITP) grant funded by the Korea government (MSIT) (No.2018-0-00245), And it was also supported by the Basic Science Research Program through the National Research Foundation of Korea (NRF) funded by the Ministry of Education, Science, and Technology (grant number: NRF2016R1D1A1B01011908).

Rui FU was born in China 1990, received her (MS) degree in System Theory from Qingdao University - China in 2012-2015. Currently, She is a Ph.D. student in the Department of Information and Communication Engineering at Dongseo University, Korea. Her research interests include Logistics Transportation and Mathematics.

Mohammed Abdulhakim Alabsi was born in Yemen 1987, received his BS in Computer Application from Bangalore University in India. He earned his (MS) degree at Dongseo University, South Korea in 2018. Currently, he is a Ph.D. student in the Department of Information and Communication Engineering at Dongseo University, South Korea. His research interests include IoT, VANET, UAV, artificial intelligence, cryptology, network security, computer networks and digital communications.

Ahmed Abdulhakim Al-Absi was born in Yemen 1984, he is an Assistant Professor and Head of Smart Computing Department at Kyungdong University – Global Campus in South Korea. He earned his PhD in Ubiquitous Computing at Dongseo University, South Korea in 2016. His research interests include database systems, big data, hadoop, cloud computing, distributed systems, parallel computing, high-performance computing, VANET, and bioinformatics. He received a Master of Science (MS) degree in Information Technology at University Utara Malaysia, Malaysia in 2011 and a Bachelor of Science (BS) degree in Computer Applications at Bangalore University, India in 2008.

HoonJae Lee was born in Korea 1962, received his BS, MS, and Ph.D. degrees in electronic engineering from Kyungpook National University, Daegu, Rep. of Korea, in 1985, 1987, and 1998, respectively. He is currently a professor in the Department of Information Communication Engineering at Dongseo University. His current research interests include Password Theory, Network Security, Side-Channel Attack, and Information Communication/Information Network.
