**Abstract**— The rapid development of science and technology such as multimedia technology has offered a better tool to explore the new teaching method. In fact, multimedia technology has played an important role in English language teaching, especially, in the non-native speaking of English situations. It also aims to make non-native speakers of English as language teachers aware of the strategies to use it in an effective manner. This paper aims to analyze the use of technology to English language teaching in the non-native speaking countries and to bring out the problems faced by both teachers and learners of English. Multimedia teaching method has been used in college English teaching wider and wider. It has contributed a lot to higher teaching quality. Chalk and Talk teaching method is not enough to teach English effectively. There should change in the methodology of teaching and free from all kind of biasism. Not only that a teacher must have the quality of adapting himself/herself to the new technological revolution by incorporating it into teaching practices. This paper gives an in-depth analysis of the new methodology that could be adopted in teaching practices in order to make teaching effective and student centric.

**Keyword**— Multimedia, learning strategies, personality, technology, Web based learning.

**Deepanjali Mishra** has completed her PhD in English from Utkal University, Bhubaneswar. Area of interest includes Feminism and Gender Studies, Sociology, Linguistics, Management. Has over 15 years of teaching and research experience "Published a book titled I am A Woman". Organized a National Workshop and International Conference in December 2017.

**Mangal Sain** received the M.Sc. degree in computer application from India in 2003 and the Ph.D. degree in computer science in 2011. Since 2012, he has been an Assistant Professor with the Department of Computer Engineering, Dongseo University, South Korea. His research interest includes wireless sensor network, cloud computing, Internet of Things, embedded systems, and middleware. He has authored over 70 international publications including journals and international conferences. He is a member of TIIS and a TPC member of more than ten international conferences.
