

Dr. Viet-Thang Vu is lecturer and the head of Information System division at Hanoi University of Industry, Vietnam. His research interests include cyber-security, image processing, computer vision, machine learning, data mining.

Manh-Quang Do completed a Master's degree in Information Systems from Hanoi University of Industry in 2022. Currently, he is working as an AI engineer at Giao Hang Tiet Kiem joint stock company. His main research areas are computer vision and natural language processing.

Dr. T.T. Quyen Bui is a researcher and a head of Department of Automation Technology, Institute of Information Technology (IOIT), Vietnam Academy of Science and Technology (VAST) since May 2015. Dr. Bui's current research interests include embedded systems, robotics, measurement systems, computer vision, brain-computer interface, IoT.

Thanh-Duc Vu received a BS degree of Information Technology from Moskva Technological University in 2008. Since 2009, he's been with the Information Technology Center at Ha Noi University of Industry, Vietnam, where he is now a lecturer. His main research areas are machine learning, data analytic and data science.

Assoc. Prof. Dr. Viet-Vu Vu received the B.S. degree in Computer Science from Ha Noi University of Education in 2000, a M.S. degree in Computer Science from Ha Noi University of Technology in 2004, and a Doctor Degree in Computer Science from Paris 6 University in 2011. He is a researcher at Information Technology Institute, Vietnam National University, Hanoi. His research interests include clustering, active learning, semi-supervised clustering, and E-government applications.

Dinh-Lam Pham is a research professor in the Contents Convergence Software Research Institute at Kyonggi University, South Korea. His research interests include video retrieving system, deep learning, workflow systems, BPM, workflow-supported social and affiliation networks discovery and analysis, process mining, deep-learning-based process predicting.

Assoc. Prof. Dr. Hong-Seng Gan received his BEng and PhD in Biomedical Engineering from Universiti Teknologi Malaysia in 2012 and 2016, respectively. He is a faculty member of School of AI and Advanced Computing, Xi'an Jiaotong – Liverpool University, Suzhou, China. His research areas focus on machine learning, computer vision and medical image processing.
