

Tsung-Yu Tsai received the B.S. degree in electrical engineering from National Cheng Kung University, Tainan, Taiwan, in 2005 and the M.S. degree from the National Taiwan University (NTU), Taipei, Taiwan, in 2007. From 2007, he serves as the engineer of the Institute of Information Industry, Taipei, Taiwan. He is currently also working toward the Ph.D. degree with the Graduate Institute of Communication Engineering, NTU. His current research areas focus on stochastic processes, algebra theory, information theory, optimization theory, physical layer design of OFDMA systems, and wireless communications.

Yao-Liang Chung received the B.S. degree in electrical engineering from Chung Yuan Christian University, Chungli, Taiwan, in 2004 and the M.S. degree from the National Taiwan University (NTU), Taipei, Taiwan, in 2006. He is currently working toward the Ph.D. degree with the Graduate Institute of Communication Engineering, NTU. His academic research interests include stochastic processes, statistical theory, queueing theory, information theory, optimization theory, packet scheduling algorithms, wireless communications, and performance modeling of cellular and wireless networks. Mr. Chung is a member of the Phi Tau Phi Honorary Society.

Chun-Che Chien is currently working toward the Ph.D. degree with the Graduate Institute of Communication Engineering, National Taiwan University, Taipei, Taiwan. His research interests include MIMO and wireless communications.

Zsehong Tsai received the B.S. degree in electrical engineering from the National Taiwan University (NTU), Taipei, Taiwan, in 1983 and the M.S. and Ph.D. degrees from the University of California, Los Angeles, in 1985 and 1988, respectively. From 1988 to 1990, he was a Member of Technical Staff with AT&T Bell Laboratories, where he investigated performance aspects of network management systems. Since 1990, he has been with the Department of Electrical Engineering and the Graduate Institute of Communication Engineering, NTU, where he is currently a Professor. From 1998 to 2004, he joined the National Telecommunication Program Office, National Science Council (NSC), Taiwan, as the leader of the Broadband Internet Research Group. He has been active in telecommunication deregulations since Taiwan started the liberalization process of its telecomm market. For many years, he was a member of the Telecommunications Advisory Board of the Ministry of Transportation and Communications (MOTC), Taiwan. From 2002 to 2004, he was assigned by the MOTC to serve with the Board of Directors of Chunghwa Telecom (CHT). Since 2004, he has become an Independent Director of CHT. From 2004 to 2006, he also served as the Deputy Executive Secretary of the Science and Technology Advisory Group of the

Executive Yuan. Since 2009, he has been the Deputy Executive Officer of the Networked Communication Program of the NSC. His academic research interests include broadband networks, performance analysis, and network planning. His recent research interests include topics in spectrum planning and telecommunication policies. Dr. Tsai was the recipient of the Chinese Institute of Engineers Technical Paper Award in 1997.

Hsueh-Jyh Li was born in Yun-Lin, Taiwan, Republic of China, on August 11, 1949. He received the B.S.E.E. degree from National Taiwan University, Taipei, Taiwan, in 1971, the M.S.E.E. degree in 1980, and the Ph.D degree from the University of Pennsylvania, Philadelphia, in 1987. Since 1973, he has been with the Department of Electrical Engineering, National Taiwan University, where he is a Professor. He is the Director of the Communication Research Center at NTU from 1995 to 2000. He was the Chairman of the Graduate Institute of Communication Engineering at NTU from 1997 to 2000. He received the Distinguished Research Award from the National Science Council, Republic of China, in 1992. His main research interests are in microstrip antennas, radar scattering, microwave imaging, and wireless communication.
