Speaker's Biography (Please detail below special points of background experience)			
I am Hui-Hsiung Chung. I'm studying for master degree in National Chi Nan University (NCNU) in Taiwan now, and I also got my bachelor degree in NCNU. During the time of taking Independent Study in the junior, I have took a part in Network Communication Software and Inspiration Application Contest 2008 (NCSIAC 2008) and got the Excellent work. I felt a sense of accomplishment of doing research, and I did learn a lot during that time. Therefore, I stayed in NCNU and digging deeply in network related researches. My research topics are focus on SIP and IPv6 application, and I certificated as a Sage level by Hurricane Electronic IPv6 certification. In order to acquire more experiences of participate International conference, I participated IETF 82 meeting in Taiwan, where I've met a lot of top scholars in IETF 82, such as Radia Perlman, the inventor of Spanning Tree. Unknown things always interest me, on the way of learning; I want to know those I don't know.
