Abstract— Security problem is an essential requirement for data transmission. Although the will known methods of data encryption attain certain security levels, they make the encrypted data unreadable, and unnatural, this attracts some unintended observer attention. So it is required to search for a higher security approach. The present paper introduces a new hybrid steganography algorithm to achieve a higher level of security. The proposed algorithm consists of a compound processing using Chaos – Fuzzy- Thresholding steganography method (CFT). Implementation of the proposed CFT hybrid algorithm shows a higher degree of security level. The hidden data reconstruction is based on an inverse CFT steganography algorithm processing.

Index Terms— Chaos, Steganography, Fuzzy, thresholding

***Mazhar Basyouni Tayel** is professor in Faculty of Engineering, Alexandria University, Alexandria, Egypt. He holds B.Sc. in Electronics and Communications from Faculty of Engineering, Alexandria University, He also holds M.Sc. and Ph.D. in Electrical Engineering from Faculty of Engineering, Alexandria University. He taught many technical courses in Electrical and Electronic (Analog and Digital) system design and Implementation, works as System Engineer for more than 20 years, teach up to 30 undergraduate, postgraduate subjects, supervising more than 75 thesis, publish more than 150 papers in different international conference, Forums and Journals.*

Alaa El-Din Sayed Hafez is an affiliate instructor in Faculty of Engineering, Alexandria University, Alexandria, Egypt. He was born in Cairo, Egypt in 1967 and became a member of IEEE in 2000, a Senior member of IEEE in 2011. He holds B.Sc. in Electronics and Communications from Faculty of Engineering, Alexandria University, M.Sc. in Electronics and Communication from Arab Academy for Science and Technology and Maritime Transport, Alexandria. He also holds M.Sc. and Ph.D. in Electrical Engineering from Faculty of Engineering, Alexandria University. He received many technical courses in Surveillance Radar design and Implementation, work as Radar System Engineer for more than 5 years, teach up to 20 undergraduate subjects, supervising more than 12 thesis, publish more than 50 papers in different international conferences and journals.

Hamed Shawky Zied is a Post Graduate Student (Ph.D.), Alexandria University, Alexandria, Egypt and became a Member of IEEE in 2012. He was born in Minoufia, Egypt in 1973. He holds B.Sc. in Electronics and Communications from Faculty of Engineering, Alexandria University, M.Sc. in Electrical Engineering from Faculty of Engineering, Alexandria University. He received many technical courses in electronic engineering design and Implementation.
