Abstract— Using Markov chain model we propose a queueing model to analyze the performance of WiMedia system with frame aggregation of video traffic. Then we propose an analytic method to find the solution of the queueing model. To validate the proposed method, we compare the simulation result and the analytic solution in the average throughput, the mean delay, and the frame loss rate.

Keyword— Performance analysis, UWB, Gigabit, Wireless, Video.

Man Soo Han received the B.S., M.S. and Ph.D. degrees in electrical engineering from Korea Advanced Institute of Science and Technology (KAIST), Korea in 1992, 1994 and 1999 respectively. He was a senior researcher of the Electronics and Telecommunications Research Institute (ETRI) Daejeon, Korea from 1999 to 2003. He is an associate professor in the Department of Information and Communications Engineering at Mokpo National University, Korea. His research interest includes scheduling in high speed networks, wireless networks and passive optical networks. He is a member of IEEE, OSA, IEICE, and KICS.
