(Pt9)Abstract—This paper outlines big data infrastructure for processing data streams. Our project is distributed stream computing platform that provides cost-effective and large-scale big data services by developing data stream management system. This research contributes to advancing feasibility of big data processing for distributed, real-time computation even when they are overloaded

(Pt9)Keyword— Data Stream Processing, Big Data Platform

Yong-Ju Lee received the B.S. and M.S. degrees in computer engineering from Chonbuk National University, Korea in 1999 and 2001, and Ph.D. degree in computer engineering from Chungnam National University, Korea in 2011. He joined Electronics and Telecommunications Research Institute(ETRI), Daejeon, Korea in 2001. During the years from 2002 to 2006, he involved in development of Next Generation Internet Server. Since 2007, he has been involved in development of Global Internet Service Solution. In 2010, he has been a visiting scholar in Virginia Tech University, USA. He is currently a senior research member and his research interests include high-speed network architecture, multimedia streaming, distributed file system and so on.

Myungcheol Lee received the M.S. degrees from Chungnam National University, Korea. He joined Electronics and Telecommunications Research Institute (ETRI), Daejeon Korea. He is currently a senior research member in ETRI.

Mi-Young Lee received the M.S. degree from Seoul National University, Korea. She joined Electronics and Telecommunications Research Institute (ETRI), Daejeon Korea. She is currently a principal research member in ETRI.

Sung Jun Hur received the Ph. D degree from Kyungpook National University, Korea. He joined Electronics and Telecommunications Research Institute (ETRI), Daejeon Korea. He is currently a principal research member in ETRI.

Okgee Min received the Ph.D degree from Chungnam National University, Korea. She joined Electronics and Telecommunications Research Institute (ETRI), Daejeon Korea. She is currently a senior principal member in ETRI.
