# NFP Brokering for VNF Chaining Models

TaeYeon Kim and BhumCheol Lee

*Network & Computing Convergence Research Lab, Department of Smart Networking, ETRI*

**tykim@etri.re.kr**

*Abstract*— **NFP brokering framework is suggested to secure interoperability between heterogeneous chaining methods known so far and to address branching issues to reflect behaviour of VNFs to NFP forwarding rules at run time. Also, Functional architecture and interface between functional blocks of the framework are proposed based on NFP management information provided by the NFP control and orchestration.**

*Keyword*— **NFV, Network Forwarding Path, Service Functions Chaining, Orchestrator, NFP broker**

**TaeYeon Kim** received Ph.D. degree in computer science from ChungBuk National University, Korea, in 2007. He also received B.S. and M.S. degrees from Chung-Ang University, Seoul, in 1990 and 1992, respectively. He joined Electronics and Telecommunications Research Institute (ETRI) in 1992. His research includes network & computing convergence platform, SDN and NFV technologies for future network.

**Bhum Cheol Lee** received M.S. and Ph.D. degree in Electric Engineering from Yonsei University, Korea in 1983 and 1997, respectively. He is currently Manager of Networking Computing Convergence Lab. in Electronics and Telecommunications Research Institute (ETRI), Korea. His research interests are Smart Network, Parallel Flow Processing and Network Virtualization.
