Abstract—The Smart Farming services at the pre-production stage are important in that they support agricultural producers' or distributors' decisions by providing related information and consulting when they plan to produce or purchase before the production starts. A service model is required to derive necessary service features that support these missions. Therefore, the service model and related service requirements are proposed in this paper for the future standardization.

Keyword— Pre-production stage, Smart Farming

Soong-Hee Lee received the B.S., M.S., and Ph.D. degrees from Kyungpook National University, Korea in 1987, 1990 and 1995, respectively. From 1987 to 1997, he was a member of research staff in Electronics and Telecommunications Research Institute. Since 1997, he has been with the department of information and communications engineering, Inje University. His research activities are in the area of next generation network technologies and services. He was designated as an IT Standard Expert on behalf of Korea by Ministry of Information and Communications in 2001. He is an Editor in the ITU-T SG13.

Dong-Il Kim received the B.S., M.S., and Ph.D. degree in electronics information and communication engineering from Kwang-woon University, Korea, in 1981, 1983 and 1992, respectively. Since 1991, he has been at Dong-Eui University, Korea, where he is a professor at the information and communication engineering department. From 1983 to 1991, he was a general manager at switching research center in LG information and communication institute. He was a visiting researcher at standardization research center, ETRI from 1998 to 1999. He was designated as an IT Standard Expert on behalf of Korea by the KCC in 2002. He is an Editor in the ITU-T. His research interests are analysis of performance in a communication networks, protocols in wireless networks and standardization of ICT.

Sok-Pal Cho received a Ph.D.(1992) from the Kyung Hee University, Seoul Korea. He was a computer system engineer at Control Data Corp. since 1976. He was a senior researcher at R&D Center, Sam Sung Co., from April 1984 to February, 1994. He was an assistant professor in the Division of Information and Data Communication at Nam Seoul University, Korea in 1994. He joined the department of Computer Communication Engineering, the Sungkyul University, Korea since 1995. Currently he is a professor of Telecommunication engineering and a vice president, Sungkyul University, Korea. He contributed 30 contributions regarding Y.iras (IT Risk Analysis Service) and Y.ctmp (Convergence Terminal in multiple network and application service provider environment) to ITU-T. He has published 56 papers and presented 13 documents on SIEC International Conference. He is a senior member of IEEE since 1995, a life member and vice president (1997~2007) of KIISC(Korea Institute of Information Security & Cryptology) since 1997, His interests are Network Security, Network Protocol, ATM and MPLS switching, E-learning, Next Generation Network, Future Network, and IT Risk.

Heechang Chung received the B.S degree from Korea University, Korea in 1980, M.S and P.H degree from Aju University, Korea in 1989 and 1997. He was a principal researcher at ISDN Center, ETRI from April 1980 to November 2000. He was a principal researcher at National Research Network Center, NIA from November 2000 to June 2014. Currently he is a professor of Telecommunication engineering, Dongeui University, Korea. His current research interests include future service management, service creation and standardization in ITU-T SG13.
