Abstract— These instructions give you guidelines for preparing papers for IEEE TRANSACTIONS and JOURNALS. Use this document as a template if you are using Microsoft *Word* 6.0 or later. Otherwise, use this document as an instruction set. The electronic file of your paper will be formatted further at IEEE. Define all symbols used in the abstract. Do not cite references in the abstract. Do not delete the blank line immediately above the abstract; it sets the footnote at the bottom of this column.

Keyword—Artificial Intelligence, Cancel Cell Image, Cellular Analysis, Recognition

Ming-Shen Jian was born in Kaohsiung City, Taiwan in 1978. He received the B.S. from the National Chiao Tung University, HsinChu, and Ph.D degrees in Computer Science and Engineering from the National Sun Yat-sen University, Kaohsiung, Taiwan in 2007. From 2018, he was an Associate Professor and director with the National Formosa University Cloud Computing and Intelligent System Laboratory. Currently he is also an IEEE Senior Member. Since 2009, he has been an Assistant Professor with the Computer Science and Information Engineering Department, National Formosa University. He is the author of four books, more than 50 articles, and at least 15 invention patents. His research interests include IOT development and application, Big Data, Optimal Solution, Intelligent System, and Cloud Computing. He was a Secretary of the Taiwan Association of Cloud Computing. Dr. Jian was a recipient of the IEEE sponsored international conference Paper Award in 2016, 2017, and 2018.

Yi-Ling Ye was born in Tainan City, Taiwan in 1971. She received her B.S. degree in Department of Clinical Laboratory Sciences and Medical Biotechnology, College of Medicine, National Taiwan University in 1993. She received her M.S. and Ph.D. degrees in Graduate Institute of Immunology, College of Medicine, National Taiwan University in 1995 and 2002, respectively. During 1999 to 2007, she was used to teach at Department of Medical Science and Biotechnology, Chung Hwa University of Medical Technology. From 2008 to now, she was Professor and director with the National Formosa University Molecular Immunology Laboratory. Her research interests lie on cellular immunology and immune regulation in disease.

Wen-Yu Chung currently is a bachelor degree student of Dept. Computer Science and Information Engineering at National Formosa University. Her current research interests are in the area related to object recognition and segmentation, and image progressing. She joins the Cloud Computing and Intelligent System Lad. (CCIS Lab.) from 2022.

Wen-Xuan Li is a master's student in the Department of Biotechnology at National Formosa University. Her research interests focus on the identification and analysis of cell death patterns in various leukemia cells. She joins the Molecular Immunology Lab (MI Lab) from 2022.

Yan-Ting Lin is currently a bachelor's degree student in the Department of Biotechnology at National Formosa University. His research interests focus on the identification and analysis of cell death patterns in K-562 leukemia cells. He joined the Molecular Immunology Lab (MI Lab) in 2023.

Bo-Yuan Huang currently is a bachelor degree student of Dept. Computer Science and Information Engineering at National Formosa University. His current research interests are in the area related to Cloud Computing and Docker container services, security, and intelligent system. He joins the Cloud Computing and Intelligent System Lad. (CCIS Lab.) from 2021.

Javeria Sikandar is a master's student in the Department of Biotechnology at National Formosa University. She is a Medical Lab Technologist and a graduate of Children's Hospital Lahore, Pakistan, with strong academic credentials. Driven by her passion, she pursued a position as a Research Assistant in Hemato-Technology at the University of Health Sciences, Lahore, Pakistan. She has over three years of experience working in reputed medical laboratories.

Yu-Jung Chang is a master's student of Dept. Computer Science and Information Engineering at National Formosa University. Her current research interests are in the area related to medical information engineering and IoT device designing. She joins the Cloud Computing and Intelligent System Lad. (CCIS Lab.) from 2024.
